ПИКЕТИРОВАНИЕ ХАРЬКОВСКОГО ОБЛСОВЕТА С ТРЕБОВАНИЕМ ПРИЗНАТЬ ГЕНОЦИД В НЕЗАВИСИМОЙ УКРАИНЕ

Председателю Харьковского областного Совета

Резолюция

пикетирования Харьковского областного Совета

26.10.2007

г. Харьков

Мы, участники пикетирования Харьковского областного Совета заявляем следующее.

С 1991 г по 2002 г. в Украине и в Харьковской области имел место геноцид коренного населения Украины и Харьковской области.

Геноцид 1991 - 2002 -х годов заключается в умышленном создании условий расчитаных на частичное уничтожение национальной группы - коренного населения Украины, и в частности Харьковской области.

Объективная сторона преступления геноцида выражается в наличиии условий расчитанных на частичное уничтожение населения, а именно:

- низкая оплата труда - наемный работник тратит больше физических и моральных сил на работу, чем получает за нее компенсацию в форме заработной платы. Вследствие чего здоровье работников ухудшается, они часто болеют и преждевременно умирают.
- низкие пенсии, пособии, стипендии, не обеспечивающие сохранение здоровья.
- низкия пособия по уходу за детьми до 3-х лет, отсутствие пособий для детей более старшего возраста, что является грубейшим нарушением статьи 46 Конституции Украины. Из-за нищенской жизни большинства граждан, низкой оплаты труда совершеннолетние граждане Украины не могут себе позволить родить и содержать детей. Вследствие чего население Украины сокращается, что подтверждает факт геноцида.

- фактически платная медицинская помощь, что является грубейшим нарушением конституционного права на охрану здоровья и бесплатную медицинскую помощь, гарантированного статьей 49 Конституции Украины. Из-за низкого финансирования учреждений здравоохранения, высоких поборов со стороны врачей, исторически сложившаяся на Украине группа населения, которая постоянно проживает на территории Украины, не может позволить себе восстановить здоровье. Вследствие чего здоровье данной грппы ухудшается, люди болеют и преждавременно умирают, таким образом население сокращается.
- высокие тарифы на коммунальные услуги, террор со стороны коммунальных служб (при отключении отопления, воды, электричества за долги квартиры являются непригодными для проживания, так как нарушены санитарные и технические нормы, вследствие чего здоровье должников ухудшается).

Факты геноцида подтверждаются последствиями данного преступления, а именно:

- сокращение населения Украины на 340 тыс чел. в год., в том чилсле и по Харьковской области потери населения от геноцида составляют 14 000 человек в год.
- за 15 лет геноцида население Украины сократилось на 12 - 16 %. Потери населения Харьковской области составляют также около 12 %.
- Грабежом вкладов сбербанков УССР на сумму более 130 млрд. советских рублей, т.е. в среднем около 50 тыс гривен на человека.
- Количество жертв геноцида (т.е. потерпевших) в Украине составляет около 32 миллионов человек, а в Харьковской области - более 1,5 миллиона. Жертвой геноцида **очевидно** является человек, доход которого ниже прожиточного минимума. А таких по статистике в 2003 году - 70 % населения Украины. Материальный ущерб причиненный жертве геноцида составляет 700 тыс гривен за 15 летний период геноцида. Материальный ущерб рассчитан как разнца между средней зарплатой в 1989 году, умноженной на коэфициент 20 (рост цен и тарифов) и средней зарплатой в 2002 году.
- сокращение средней продолжительности жизни. Продолжительность жизни украинцев с 1991 года по настоящее время сократилась на 15 лет по сравнению с большинством народов мира. Согласно статистики ВОЗ по показателю средней продолжительности жизни Украина отстала от стран Центральной Европы на 5,5 лет, а от стран ЕС почти на 11 лет.
- эпидемией деградации здоровья населения за истекшие 10 лет. В настоящее время в Украине нет практически здоровых лиц, в том числе и среди новорожденных, когда у каждого имеется сразу по несколько заболеваний в самых различных сочетаниях. Более 21 миллиона, т.е каждый второй наш соотечественник страдает сердечно-сосудистой патологией, сосудистой гипертонией поражено более 10 миллионов. Онкопатология по уровню заболеваемости и смертности переместилась с десятого на второе место в Украине. На онкологическом учете состоит каждый десятый. Половые

нарушения отмечаются у каждого второго мужчины и женщины. Аллергией страдает каждый второй - третий украинец. Патологией со стороны нервной системы, как указывает статистика, страдает каждый третий. В республике по официальным данным около 1 миллиона 200 тысяч страдают психическими заболеваниями. Растут эндокринные заболевания. Прогрессивно нарушается жировой обмен: ожирением и избыточным весом страдают 36 % мужчин, 41 % женщин и 16 % детей. Болезни верхних дыхательных путей отмечаются у каждого второго. В Украине сегодня, по определению главного пульмонолога и фтизиатра Министерства здравоохранения, профессора Ю. Фещенко, "бушует эпидемия туберкулеза". По критерию ВОЗ, эпидемия объявляется когда количество заболеваний превышает 50 случаев из 100 тыс. населения. Эпидемия туберкулеза в Украине объявлена в 1995 году. Туберкулезом болеет 80 жителей Украины из 100 тыс населения. Как известно, причиной туберкулеза является неполноценное питание.

С геноцидом также тесно связано и другое преступление: похищение вкладов сбербанка СССР путем их обесценивания (инфляции) и "замораживания". Это было сделано для того, чтобы жители Украины во время геноцида 1991 - 2007 годов не могли воспользоваться своими вкладами, чтобы поправить свое здоровье: купить продукты питания, подлечиться и пр.

Геноцид проявляется в умышленном создании условий, расчитаных на частичное сокращение количества коренного населения Харьковской области. По расчетам Ярослава Карачевцева материальный ущерб, причиненный каждому жителю Харьковщины составляет 200 000 гривен, а урон, нанесенный ВВП г. Харькова составляет 40 триллионов гривен (40 000 000 000 000 в ценах 2007 года). Количество жертв геноцида (потери населения) только в Харьковской области составляют до 20 000 человек в год.

Таким образом нынешняя власть нанесла урон промышленности Украины и Харьковской области в 50 раз больший, чем это сдлали фашисты во время 2 мировой войны.

Если не предпринять безотлагательных мер, то через 70 - 120 население Харьковской области вымрет от эпидемии роста болячек, скрытого голода, сокращения населения.

В связи с чем просим предпринять безотлагательные меры по предотвращению геноцида 1991 - 2002 годов и диверсий в Х/о. В частности, просим принять решения сессии Харьковского областного совета и признать факт геноцида 1991 - 2002 г.г. против населения Украины, и в частности населения Харьковской области. Просим создать благотворительный фонд помощи потерпевшим от геноцида 1991 - 2002 г.г. и обратиться к парламентам всех стран мира и к Генеральной Ассамблее ООН с просьбой оказать материальную помощь жителям Харькова - потерпевшим от геноцида 1991 - 2002 г.г. По самым скромным подсчетам количество потерпевших от геноцида 1991 - 2002 г.г. составляет около 70 % населения. Просим увековечить память погибших от геноцида 1991 - 2002 г.г. и увековечить в веках память о пострадавших от геноцида 1991 - 2002 г.г.

От фракций Харьковского областного совета просим поддержать инициативу Харьковчан.

При этом обращаем ваше внимание, что Управление СБУ в Харьковской области, а также Киевский районный суд г. Харькова сейчас рассматривают в уголовно-процессуальном порядке заявления жителей Харькова о возбуждении уголовного дела по факту геноцида 1991 - 2002 г.г.. диверсий против важных народнохозяйственных объектов Харьковщины и незаконного присвоения народной собственности.

СОЛИДАРНОСТЬ С КУБОЙ

27 октября 2007 г. Харьков посетил Председатель Всуекраинского Комитета за свободу пяти кубинских героев, координатор Всеукраинской Ассоциации Дружбы и Солидарности с Кубинским народом, доктор экономических наук, гр. Кубы Мануэль Лопес.

В ходе своего визита он посетил Музей - диараму воинов - интернационалистов (ул. Юрьевская, 7) при общественной организации воинов Афганистана и общественой организации воинов Вьетнама.

В 10 часов состоялась встреча в Харьковской областной организации Союз Чернобыль, где был продемонстрирован фильм о программе безкорыстной помощи Кубинского народа украинским детям - чернобыльцам. В ходе визита рассматривался вопрос об оздоровлении харьковских детей - чернобыльцев на Кубе и в Евпатории, где работают 5 врачей - кубинцев. Мануэль Лопес передал руководству Союза Чернобыль письмо Чрезвычайного и Полномочного Посла Республики Куба в Украине Хулио Гарендия, в котором посол Кубы передал теплый привет от имени Кубинского Государства и народа. *"Куба, в свою очередь, помогала украинскому народу посредством программы "Дети Чернобыля", благодаря которой за последние семнадцать лет более двадцати двух тысяч маленьких пациентов Украины получили высококачественную медицинскую помощь. Куба и впредь будет оказывать эту помощь до тех пор, пока она будет нужна украинскому народу"*, - говорилось в письме.

В 12 часов в Харьковском национальном университете им. В.Н. Каразина на историческом факультете состоялась встреча Мануэля Лопеса со студентами исторического факультета. Был продемонстрирован фильм об экономической блокаде Кубы и тяжелых днях Кубинского народа после конрреволюционного переворота в СССР в 1991 году.

В 14 часов в комнате Совета ветеранов состоялось учредительное собрание общественных и политических организаиий, а также рядовых граждан по поводу образования организаций, солидарных с Кубинским народом. Участникам встречи был показан фильм о террорестических актах по отношению к Кубе и о героях анти-террористах Герардо, Антонио, Рамона, Фернандо, Рэне, которых американская реакция незаконно содержат в тюрьмах США за то, что они предотвратили 170 террористических актов, которые планировала американская мафия, засевшая в Маями, США, провести на Кубе.

По окончанию встречи было принято решение о создании Харьковской Областной Ассоциации Дружбы и Солидарности с Кубинским Народом и Харьковского Областного Комитета за Свободу Пяти Кубинских Героев. Протоколы о создании этих двух движений солидарности с Кубой подписали: От Харьковского областного антифашистского комитета Мельников В.А., от Харьковского областного объединения "За культурно - языковое равноправие" Макаров Г.В., от Харьковской областной комиссии по защите прав политзаключенных Бибик А.Т., от Харьковской областной газеты "Столица будущего" Карачевцев Я.Н., от Харьковской городской правозащитной организации Альянс "Квириты" Справедливцев В.И., от первичной организации КПУ "Корчагинская" Рубан В.Н., от первичной комсомольской организации Московского района г. Харьова Дорошенко С.В., от первичной организации КПУ с. Чернещина Зачепиловского р-на Харьковской обл. Золотухина И.А. Протоколы также подписали гр. Андрущенко Л.Ф., Пугач Е.Г., Мирошниченко Т.К., Жихарева Л.И.

Как отмечено в учредительных протоколах Ассоциация и Комитет созданы с правом коллективного и индивидуального членства. Протоколы являются открытыми для подписания.

Посол Республики Куба Хулио Гармендия в своем письме передал участникам собрания теплый привет от имени Кубинского Государства и народа. *"Позвольте мне передать вам благодарность кубинского народа за солидарность, которую вы выражаете каждый день нашей стране, и заверить вас, что Куба всегда будет рядом с украинским народом"*, - говорилось в письме.

Встречи освещали журналисты Макаров Г.В., Дудко Д.М., Мельников В.А., Дорошенко С.В., Карачевцев Я.Н., Олейник К.

СВОБОДУ ПОЛИТЗАКЛЮЧЕНЫМ!

Украинские комитеты требуют освобождения пяти кубинских героев

Гавана, 17 октября (acn) Несколько украинских комитетов за освобождение Кубинской Пятёрки потребовали немедленно выпустить на волю этих борцов против терроризма.

В городе Харьков недавно созданный комитет солидарности с Херардо Эрнандесом, Рамоном Лабаньино, Фернандо Гонсалесом, Антонио Герреро и Рене Эрнандесом, известный по всему миру как «кубинская пятёрка», потребовал их освобождения.

Харьковский комитет был создан 25 сентября. В нём состоят члены Коммунистической партии, члены движения трудящихся Харькова, представители марксистских организаций и Ленинского Комсомола.

9 сентября коммунистический лидер Ярослав Карачевцев опубликовал статью, я которой разъяснил обстоятельства ареста и судебного процесса против пяти кубинцев.

Житомирский областной комитет «За свободу Пяти Кубинских Героев», в свою очередь, выпустил заявление от того же числа, приуроченного также 40-летию со дня смерти Эрнесто Че Гевары.

Другие группы в ряде украинских городов, например в Севастополе, потребовали немедленного освобождения пяти кубинских героев и выплаты компенсации морального ущерба им и кубинскому народу в целом.

Заявление Житомирского областного комитета
«За свободу Пяти Кубинских Героев»

9 октября во многих странах мира прошли акции памяти в честь героя кубинской революции, и мирового революционного движения Эрнесто Че Гевары. Именно в этот день он геройски погиб от рук боливийских солдат, которые находились под руководством ЦРУ.

Многие считают что этим событием закончилась эра великих революционеров, борцов за лучшие условия жизни для миллионов людей земли. Но это далеко не так. После этого события продолжали появляться люди желающие наследовать легендарных предшественников, а порой это заставляла делать их сама жизнь, поскольку других вариантов кроме как обороны своей Родины, порой ценой своей собственной жизни и здоровья, у них не было.

К таким людям относятся Герардо Эрнандес Нордело, Рамон Лабаньино Саласар, Антонио Геррро Родригес, Фернандо Гонсалес Льорт, Рене Гонсалес Сехвереpт деятельность которых помогла предотвратить более 170 террористических актов против Кубы.

Пятеро кубинцев действительно достойны высокого звания героев и борцов за благополучие и процветание своего народа, который не забывает своих героев где бы они ни были, даже в тюрьмах Мировой Империи Зла - Соединенных Штатов Америки.

Они являются героями не только для своего народа, но и примером для многих людей по всему миру, в том числе и для настоящих украинских патриотов. Так в этот день представители многих организаций в том числе и Житомирского городского комитета "За свободу Пяти Кубинских Героев" возложили цветы к мемориальной доске великого коменданте Че Гевары в городе Киеве.

В планах ЖГК "За свободу Пяти Кубинских Героев" показ фильмов и проведение встреч с учащимися школ, ПТУ и ВУЗов.

Народ Украины должен учиться на борьбе кубинских героев для того чтоб в ответственный для страны момент каждый сознательный украинец сделал верный выбор в пользу свободы, равенства и братства!

Свободу кубинским героям!!!

Заявление Встречи III Международной солидарности с Кубой

Уважаемые товарищи!
Херардо Эрнандес Нордело, Рамон Лабаниньо Саласар, Рэне Гонсалес Сехвереpт, Фернандо Гонсалес Лъорт, Антонио Гереро Родригес!
Дорогие друзья!

Свой горячий привет и слова восхищения Вашим мужеством шлют участники III Международной Встречи солидарности с Кубой обществ дружбы и организаций воинов-интернационалистов (кубинцев) стран СНГ.

Многие годы мы с возмущением наблюдаем как правящие круги Соединенных Штатов Америки руками судейских чиновников творят произвол по отношению к Вам - пяти героям-патриотам, вымещая таким образом свою ненависть к гордому свободолюбивому кубинскому народу.

Эта беспричинная ненависть и бессмысленная вражда уже унесли тысячи жизней, покалечили тысячи судеб, нанесли огромный экономический ущерб народам США и Кубы.

Они противоречат интересам американского народа, и делают официальный Вашингтон смешным в глазах всего мира.

В свою очередь, наши народы связывают многолетние узы дружбы, честного взаимовыгодного сотрудничества, уважения, братской помощи. Мы знаем, какой ценой кубинцы завоевали свою независимость, как самоотверженно трудились над преодолением тяжелых проблем колониального прошлого: нищетой, безграмотностью, промышленной отсталостью. Мы знаем, каких успехов добилась Куба в деле построения общества социального равенства, социальной справедливости, став за неполные 50 лет после победы революции одной из самых авторитетных и уважаемых стран в мире.

Жителям стран СНГ также известно, сколь негативно (или правильнее будет сказать, агрессивно) встретили известие о Победе революционных сил на Кубе и свержении марионеточного правительства правящие круги Соединённых Штатов Америки:

• более 40 лет бесчеловечной экономической блокады;
• военное вторжение на Плая Хирон;
• отравленные поля;
• взрывы на кубинских кораблях, самолетах, в гостиничных комплексах;

• щедрое субсидирование из госбюджета США многочисленных террористических банд, единственная задача которых - дестабилизация политической системы на Кубе.

Зная все это, друзья Кубы в России и странах СНГ ни минуты не сомневались в политическом характере майамского судилища.

Мы знаем, что неправедный суд сумел доказать только одну Вашу «вину» - любовь к Кубе, ее народу и готовность пожертвовать всем за их счастье и процветание.

Этого Вам не простили майамские судьи и их вашингтонские кукловоды. За это обрекли на разлуку с близкими и любимой Родиной, на немыслимые сроки тюремного заключения.

Но штатовские политиканы - еще не весь мир. Люди в разных странах, также как и наши сограждане, возмущены позорным майамским приговором и требуют Вашего освобождения.

Терроризм страшен. Он ежегодно уносит человеческие жизни в разных уголках планеты. И любой, кто познал на себе ужасы и горе, которые приносят мирным жителям теракты, признает за Кубой право на защиту покоя, здоровья и жизни своих граждан. Любой, кто хоронил близких или беспокоился об их судьбе, до земли поклонится героям, предотвращавшим беду, препятствовавших террористам.

Здесь на другом конце земного шара у Вас много друзей. Достаточно сказать, что Государственная Дума Российской Федерации приняла несколько обращений к Конгрессу Соединенных Штатов с призывом справедливого, честного пересмотра Вашего дела. К этому же в статьях и официальных заявлениях, на митингах и пикетах призывали правительство и судебные органы США партии и общественные организации, ученые и политики, студенты и школьники, учителя и рабочие.

Сегодняшний Международный форум собрал граждан разных стран, людей разных возрастов, профессий, национальностей. Среди нас есть воины-интернационалисты, которые еще в далекие 60-е годы прошлого века приехали на Кубу помогать ставить заслон от американских гангстеров и их наймитов. Есть те, кто содействовал укреплению обороноспособности Острова Свободы в последующие годы. Есть учителя, врачи, инженеры. Есть люди, посетившие Кубу в качестве туристов или обучавшиеся вместе с кубинскими студентами в советских ВУЗах. С нами товарищи, знающие о Вашей стране из книг, газет, рассказов тех, кто побывал на Острове Свободы и на всю жизнь сохранил теплые чувства к Кубе и ее замечательному народу.

Мы шлем Вам слова поддержки в Вашей героической борьбе.

Мы верим, что решение по Вашему делу, позорящее судебную систему и Конституцию Соединенных Штатов будет пересмотрено.

Мы уверены, что в ближайшем будущем сможем приветствовать Вас на свободе и на российской земле.

Держитесь, товарищи!

Нельзя победить тех, кто прав!!!

С уважением участники Встречи солидарности.

Нобелевский лауреат требует освобождения Пятёрки

Южно-африканский Нобелевский лауреат 1991 г. по литературе Надине Гордимер выступила в защиту незаконно осужденных анти-террористов, известных как Кубинская Пятерка. Она назвала систему правосудия США фарсом и обратилась к мировому сообществу с просьбой объединить усилия по освобождению Рене, Рамона, Антонио, Фернандо, Герардо.

Пятерка страдала как от физичеких так и психологических пыток, котрые применялись в тюремных застенках США. В своем письме, опубликованном в Нью Йорк Таймс выдающийся писатель сравнила ситуацию, которая имеет место в США с режимом аппартеида, который некогда правил в Южной Африке.

Также Национальный Комитет Компартии США, присоединившись к международному движению в защиту Кубинской Пятерки, признал, что героический подвиг, котрый совершила Пятерка отражает достижения Кубинской Революции. НК КП США подверг резкой критике нарушения, которые имели место во время судебного процесса.

В то же время в Квито в Эквадоре вышла в свет книга "5 Сынов, 5 Героев, осужденных за свое право защищать Кубу", изданная Гуаясамским Фондом солидарности с Кубой.

LETTERS TO THE NEWSPAPER

Dear comrades:

It cheers to maintain contacts to us with you. We have received your document with I title “Capitalism is genocide”, that we have placed in our page Web. You can see it in www.pcoe.net. We have made 2500 copies of this document in Russian and have given to ucranianos immigrants. The majority says to us that all whatever is said is truth. The ucranianos that work in Spain live like slaves. Generally, the ucranianas women work in houses of rich people, who in their majority are industralists. The treatment is bad, and work of sun sun. We would like to make documents for these ucranianos workers explaining their sad situation and elevating their conscience. I know many immigrants, some work in factories without legal documents and
with a very low pay. Next shipment a document on the situation in my country.

INTERNATIONAL MOVEMENT OF COMMUNISTS

Against the state of emergency, emergency situation in the Vasco country

Little by little the facists are imposing their law under protection of the malparido one “Been of Right”. The halting of militants of the Abertzale Left, the registry of houses and seats in Euskal Herria is framed within the repressive policy of the Spanish capitalist state in a war without truce against everything what puts its nature of class at issue and imperialistic.

All of them are measured, against the freedom of expression and meeting, no matter how much they are wanted to adorn. The Basque town is undergoing the siege of the Spanish state under the false pretext to end the terrorism and it becomes conejillo of India of the reactionary policy of the present facists, because the happened thing in today, is the signal of arrogance and despotism that sends the state against everything what it moves under opposite ideological principles to the monarchy, the false unit of Spain and the capitalist system.

The values that the present democracy defends, are such that it safeguard the Francoism for the simple reason that this one has not died and their continuators have encaramados themselves in the institutions of the state and the representative organizations but, and act undamaged before the passivity and the giving up of the parliamentary parties.

Once again one demonstrates that the capitalist state is an organ of oppression that defends the interests of the great capital and its administrators, through all its institutions. In this way, while the workers are scared to exert their rights, and they request sentences to prison until of 3 years and means to participate in strikes (case of Extruperfil), in as much are dismissed by hundreds to present/display to elections union, when they remain in prison in infrahuman conditions militant Communists of the PCE (r) and the liberties of the Basque town are kidnapped, true terrorists not are questioned and live to body on king, as it happens with the patronos that do not fulfill the norms of labor security, whose cause dies hundreds of workers every year.

It is absolutely false that the Spanish state does not persecute the criminal ideas but acts, as their representatives say. In this case, it is not understood that Aznar that by means of the verified lie sent the troops to invade to a foreign country and to kill to hundreds of thousands of innocent people, including children is not judged by “the

democratic" courts Where is justice? Where is Garzón? On the contrary, the government of Zapatero via Ministry of Education grants 600 million to him annual pesetas to maintain his forum of diffusion of the world-wide fascismo, that projects to annihilate the governments "Populists" of Latin America.

The PCOE condemns the repression against the workers, the Communists and specially at this moment against the Abertzale Left, Batasuna, ANV and the Communist Party of Basque Earth. In this sense it really calls to the democrats, republicans, to the revolutionary left, to raise his voice firmly, against the state of emergency, emergency situation concealed in Euskal Herria.

A hollow to the reason

To the entrance of century XXI, the Spanish labor movement suffers he himself degree of operation, humiliation, scorn and punishment that Capitalism historically has reserved for he himself to international scale. The defeat of the call field of the socialism has lead to a state of deep autismo to the punished sectors but of the new esclavista society. The new international frame has deactivated many communist organizations and has castrated ideologically to an ample fan of groups that gave sense to their fight to the light of the Revolution of October.

Nevertheless, special a referring one for the towns of Latin American constitutes the Cuban revolution. In spite of incessant the harassment of imperialism against the island, Cuba lays to ways and hopes with the construction and development of the socialism as opposed to more aggressive the imperialistic power of the history of the humanity.

Other towns, to the heat of the victories of the Cuban town in the defense of their sovereignty and the consolidation of a social policy to the service of a whole town, have initiated a long way to free themselves of the imperial yoke. In spite of the strong positions of the bourgeoisies and the internal counterrevolutions supported by the EE.UU., these countries they initiate a process of changes.

However, the only Latin American country that has defeated to the internal counterrevolution has been Cuba. What positions to this country to the revolutionary vanguard and example of all the initiated processes, not only in Latin America, but in all the planet. Only the application of the socialism, of the experiences of the marxism leninismo, has been able to build this victory.

Now, when the plans from Miami more are aired than ever, when the plans of the mercenarios installed in Florida appear ridiculed and disabled to damage the Revolution. Imperialism sends a subtle contrarrevolucionaria campaign from some mass media with incidence in the progressive sectors.

A ten of intellectuals wins the average politicians of spreading, with an unusual diffusion. Petras, Harnecker, Pedro Fields, Celia Hart and others, seem to register the fight of the towns, with a language that seems to be in tune with the sectors of the left. No militancy is known them some, is as if the organizations were of more. They raise magical prescriptions for the revolutions while its practice does not induce to the militant commitment.

In our country, tribunes in Internet for these new prattlers arose from fairs. Kaosenlared, Rebellion, and others, that do not waste the time at the time of censuring to the PCOE in their means, while they open the revolutionary doors so that pseudo- spills lies on the Cuban revolution. Applauded by reformists, trotskistas and all "istas" of which Capitalism is worth, they publish books to big drum and subjects of gossip, they participate in conferences with a high "cache", and elevate its words to the Biblical height.

By our part, with modest means of a composed communist organization essentially by workers, we raised from this Web our voice in Cuba defense and of the rich experiences of the labor movement, written by its fights and their organizations. We opened a breach to imperialism and left an opened hollow to the reason.

Communist Party Working Spain (PCOE)

Political Report

Although the developed EE.UU and countries but, are obstinate in diminishing the effects of the financial crisis, derived from the real estate speculation of that country, propagating the idea beyond that it will not go its borders and therefore, they make an effort in demonstrating that it is not an international phenomenon, the reality it prevails and it reveals that any event has universal repercussions, since the contemporary economy is a economic-political concatenation of causes and effects that multitude of countries chains.

The facts are tozudos and the measures that are adopted desdicen that the financial crisis is a purely local and possible event without greater importance. In recent dates, the central banks of the European Union, Australia, Japan, Switzerland and the United States injected to their respective financial systems more than 300 billion dollars, to the object to put boundary to a massive flight of investments. Measurement this one that as we see has its origin in the situation in which is at the moment the real estate sector of the United States that has made shake the bags worldwide.

But, this crisis does not come single and as a result of the economic readjustments which they are had to carry out by the new contradictions, that constantly the capitalist system generates, as it happens to the search of alternative energies (biocarburantes), that demands the use of great amounts of raw materials, in this case the cereals, prevén raised extraordinary of great social openwork in foods of first necessity (bread, milk etc.) as they already announce officially in some countries (Belgium, Spain…).

To greater abundance, every day that happens, the empires find more obstacles to control and to direct the course of the economic events. It is necessary to consider that because of the call "globalización", with its expansions and deslocalizaciones, through which, the multinationals have been located in distant places of their origins and countries of little industrial resonance, is forming a new world-wide panorama. The monopolies and the multinationals generate or of the total of the elaborated gross product in the world, more of 50% in the subjugated countries, in the developing nations or dependent of imperialism, in where the policy and the economy evolve with bumps, always in an atmosphere of greater instability sociopolítico with respect to the states European and North American, because their towns do not enjoy, absolutely, of which they produce. In 2007, these same countries hoard altogether, in reserves

currencies, a post that surpasses the three trillions of dollars, whereas the industrialized countries but hold half of this volume. For that reason the war and facist the antisocial laws of cut, continue being the fundamental elements to consider by the imperialistic states, to extinguish any fire that pledges in its own countries and to maintain the present situation international and of this it stews, they violently restrain all indication of independence that arises in any place of the world and that could break the new economic figure, that without a doubt exacerbaría the capitalist Inter contradictions.

It is not object of this report to enter completely the exhaustive analysis of the economic situation world-wide level, which persecutes is only the way of introduction to contextualizar the economic panorama and political Spanish, in order to elaborate our nearer and tangible tactics.

Spain is not more than a link of the imperialistic chain. Each event that takes place in another zone of the world, specially in the EE.UU affects the unfolding of the economy and the policy of our country. North American imperialism exerts in all the senses a very special influence. Any decision making that takes place in the White House, is considered and finally coreada in Europe and therefore in Spain.

The lack of a party revolutionary hard and consolidated can be affirmed that single, frees the socialist government to see put under he himself harassment that the PP received to become jumbled in the war of Iraq under the auspices of the EE.UU. To anybody can deceive the cabinet of Zapatero already in which it talks about to the participation of the Spanish army in different foreign countries, that it goes beyond the intention to provide humanitarian aid, in a clear putting in practice of the strategy imperialistic pro (European and North American) of the PSOE. We can state that in Europe, the effects of the crisis pronounce progressively and that they are to palliate with the constant ascent of the Euribor, that by the way announces a new rise for September and as it is logical, the exit to the desperate one by this conduit to the bud of the new crisis, opens new cracks in the domestic economy that is in the limit of its possibilities. These ascents increase in price the mortgages in our country. Similar speculative phenomenon, forces the working town to contract to mortgages with terms of 30 years with tendency towards the 50 years, that in too many cases also conceal credits of smaller organization to acquire vehicles, furniture etc, causing the sobreindebtedness that in the hour present asphyxia to the worker. During the second trimester of this year the Spanish families destined 44.8% of their gross rent to the acquisition of house.

She is worth the trouble to remember that the referential one for the mortgages, is going to raise shortly until 4.6%, being this one the level upper in seven years, whose propensity to the rise is so far unstoppable and will continue. The own UE returns to alert, this time with greater emphasis, of the increase of the prices in basic foods after the increase already conducted of 28% in eggs in only a year and of 75% in the flour from the past month of April. In this same direction, the greater agencies of the world of qualification of credit risk Moody Standard · s and and Poor´s, notice each one by their side, of which the call Spanish economic miracle basically impelled and maintained by the inner consumption, walks towards a “steep end”, because the forced adjustment will as resulting from take place the crisis of the international markets, that agrees and influences remarkably in the end of the “real estate boom” in Spain.

The measures that the Spanish government applies to neutralize the new crisis, have character of I patch that in anything attempt structurally to the economy, and by all

means are identical to the rest of the developed states more. In the economic thing it excels the armament cost, because by each euro that the socialist government destines to the sanitary investigation, dedicates five to the military man, in a clear effort to put itself to the height of the most belligerent countries of the imperialismos, with which it wishes to share table and table cloth.

In the political plane, the repression is the norm of conduct of the European governments that goes from the ilegalización of communist youths in Czechoslovakia to the prohibition of strikes. For example the general strike of transports in Germany summoned from the 9 of August, has been prohibited by a court of Nüremberg, with which the unit between the government and the judicial power is confirmed fehacientemente. Also the new law adopted by the National Assembly of France on the minimum services and the date of call of strikes in the transports (trains, meter bus), represents a involución in the rights of the workers. In Spain, the PP persuades to the government on the necessity to change the law of strikes, which would suppose a great step more in the backward movement than it takes to effect in the rights and liberties of the workers.

Although in other countries of the UE as it is the case of Belgium, the freedom of expression this being attacked, as pour denounces the “Plateforme I freed d´association ET d´expression”; with the usual pretext to end the terrorism; nevertheless, in the political land our governors surpass the rest of the European countries. In Spain, the taking of position on political aspects, for a long time it has been stopping being power and of the free will of the parties to happen to depend on the dictatorial imposition of the policies of the PSOE and the PP, that form a single one when it is to defend the capitalist state. A fact that demonstrates the concomitancia between both parties, facilitates us the state aid that the government of the PSOE grants during this year for the foundations run by the PP and the PSOE, that are dedicated to cultivate and to propagate their political thoughts. Around billion pesetas they distribute to the FAES of Jose Maria Aznar (tie to the PP and the international neofascismo) and the Foundation Pablo Churches of Alfonso War (bound to the PSOE) granted by the Ministry of Culture.

Under the false pretext to fight the terrorism they are jailed to militants of the nationalistic left (Otegi), ilegaliza HB and its newspaper is closed without to have used the “terrorist” overflowing its own laws and drawing for the bourgeois constitution, single violence by the fact of not condemning explicitly the ETA violence (nothing else) and as they dictate.

In our country, also they are jailed to Communists (PCEr) without to have participated in no violent act and the ilegalización of this party stays, after agreeing to the effective laws. The question is that for the governors, the important thing is not that the parties are put under their laws, of in case retrograde and more and more reactionary, but that they look for the way and the moment for prohibiting the Comunism and the opposite, at the present time, for them, means to take a step backwards. If they did not have the excuse of the terrorism they would invent new pretexts.

In the labor land it increases the repression on the union positions. In the last year more than 500 workers of all the state they have been dismissed to appear to the union elections. While, the patronos act undamaged with facist attitudes. It already is normal that the industralists defraud to the state and the worker, with non-payments of the social insurances, the use of the drug trafficking money, paying to the worker smaller amount of

the one than it says in his list, and in many occasions not even they register to his employees in the social security. But most bleeding and indignante it is impunity with which the industralist conducts itself neglecting the norms of security in the work. It is enough with saying that in six months 580 workers in their jobs have died, in which we must call and propagate like supervisory terrorism. To which there is to add that 510,302 accidents with loss took place.

Another bleeding aspect is the situation of hundreds of thousands of immigrants who live in conditions of tremendous poverty and which they constitute an important lucrative factor for the employer's association. With the purpose of multiplying its benefits industralists and landowners they make use of the means of the State to create an ambiguous frame of semi-illegality that allows the operation in optimal for the orerator and extremely míseras conditions for the immigrant. In the production relations the immigrant as person does not have value some for the industralist to who to not matters him to offer dangerous starvation wages, works and interminable labor days to them. He is not for that reason strange that the statistics show the high index of labor sinisterness of working immigrants. The rights of these workers completely are annihilated, and the industralists do not have repairs in making it public. Hundreds of thousand of women immigrants work in particular houses without discharge in the Social Security, established schedules and by irrisorios pays. In the field this situation becomes still more burdens showing the face of the cruelest and cruel operation. In the province of Huelva there are good examples of it. Thousands of workers, in their majority magrebíes, Rumanian and Polish live hacinadas in ships field in the heat of, and even work of sun sun Sundays by a wage that does not reach the 900 euros. The landowners allowed the luxury to select to these in their countries of origin guaranteeing that they had familiar loads that allowed to their submission and its infrahuman operation.

By virtue of the content of this brief report, one opens four fronts to us that we must face with decision: The fight by the liberties and rights, the scarcity of life, the unit of the workers and the attainment of which it can be the embryo of the popular front.

The fight by the liberties and the rights of the workers and the towns that compose the Spanish state acquires great importance at the moment. As much the government, as practically all the political parties that they compose the parliamentary arc, they agree in fighting the terrorism like primary task of the state, reason why, openly and others subrepticiamente, is in agreement with the application of measures that involve a serious backward movement for the town in the bourgeois democratic system. He in fact tries himself to religiously follow the impositions of the PP and the PSOE, that conceal their reactionary conducts with the combat against the “terrorism” under the slogan of which in that fight all bond.

Independently of which one agrees or not with the fight method that maintains ETA, it is not possible to be seen with good eyes, that many, too many professional and politólogos analysts of the right parties and left, attribute to their activity the implantation of undemocratic measures, (fights antiterrorist) with which, of a blow they exempt of responsibility to the bourgeois state, with the only intention to justify his passivity before a constant aggression to the liberties and the political rights.

It is evident that the bourgeois state takes advantage of any opportunity to get worse its repressive policy, but this one is a Metaphysical form to approach the problem,

the cardinal cause is necessary to look for it in the degree of development of the fight of classes.

We said previously that if international Capitalism could not make use of the "terrorism" as it excuses, would look for another justification. Today all the adversaries of the system are catalogued terrorist, yesterday, when international the communist movement was strong, to the enemies of Capitalism were called Communists to them. In Belgium the hand of the reaction is shaken to repress the freedom of expression; nevertheless, this country does not face any type of "terrorism". The Spanish workers have lost spending power, are repressed by the employer's association and its judicial institutions, without there has been no attack and without there is half-full no "terrorist" interference. The employer's association and the government of the monopolies advance, because the workers back down. At the same moment that the fight of classes acquires its true meaning by the taking of conscience of the working class, the "terrorism" will spend to a second or third plane, and it even can disappear.

It is necessary to emphasize again that the PCOE has demonstrated whenever is in favor of the fight of masses against the system and has put record of as it is his position with respect to the nationalism and to the violent acts. Beyond our proposals, nothing or nobody are the one who stops to much less impose to the PCOE a political decision making, when they need it, and that serves to corear the voices of those who practice the terrorism against the workers and try the ilegalización of the Comunism. The PCOE cannot agree with the reaction, without reduction to explain the roots of the problems that aquejan to the Spanish society within the marxism-leninismo.

While ilegalizados parties of left exist, while militant Communists and of left give with their bones in the Spanish jails, while they die working by the supervisory terrorism, while the patronos dismiss, while the workers are scared to exert the policy, the PCOE with impunity will not shake the hand to him to denounce to the bourgeois State, to request the freedom of the jailed ones and to fight unconditionally by the freedom and the rights of the workers and the towns who form the Spanish state, in this cannot be waived necessity, the PCOE will be arranged to combine their efforts with the other political forces in syntony.

We insisted on which nothing or nobody are going to us to turn aside the attention on the judgment and the explanation by the roots of the problem. The violence in the Basque Country is in the negation to this town of its right to the self-determination. The violence begins when the Spanish state imposes to Euskadi by the force of the law, the policy and the judicial repression its will, against desires of its citizens without giving option him to that these decide what wants to be and with whom they want to be. What the majority parties try is not to end the terrorism, but to prevent that the debate is opened on the right to the self-determination and is absolutely false that the "Spanish democracy" admits any political tendency and single condemns the violent method to obtain it, in such case the rejection to the weak one is not understood and decaffeinated Ibarretxe plan.

The fight against the scarcity of life at these moments in which the Spanish families feel overwhelmed by the ascent of the mortgages and the increase of the prices of foods of first necessity, must also be approached like a very important referential point, sometimes will serve departure to elevate the conscience of the working town and

has to comprise of our tactics to obtain the unit of the workers, with whom we must form the UNIQUE FRONT OF the TOWN.

That is to say, the fight against the scarcity of life and by the Unique Front of the Town. he is an all unique one to obtain the unit of the working class in the UNIQUE FRONT OF WORKERS. The unit of the working class is the alpha and the Omega of the policy of masses of the PCOE, and we will not resign to her under any concept. The unit of the workers is essential to end the bourgeois regime, for that reason the PCOE rejects with all their energies any act that comes to deepen still more, in their lamentable state of division, that delays its emancipation returning them submissive and because it constitutes an insurmountable obstacle so that the class conscience penetrates in the labor movement.

In accordance with the exposed thing, we received with bitterness the news of the constitution of a new union sponsored by the SOC, that does not do more than to separate in but pieces which this exangüe, without life. At the moment so important it is necessary to construct to unite, of what it is worth to reunite to us little that there is of conscious in a single organization while the thickness (thousand times but) of workers with little or nothing of conscience is under the rules of the division and after the influences of one hundred greater and smaller unions and of the policy of the reformist parties and right?

The assembly of committees and delegates of companies first passage to the solution of the problem

The theory all we know it: the parties of false allegiance of left (PSOE) and reformists (PCE-IU) and the unions paridos to the heat of their traicioneras policies, to which there are to add the alternatives these anchored in he himself system, are the guilty of which the labor movement is desideologizado and divided, but from here What to do?

It is evident that the problem, although it is offered to us like a vicious circle, because desideologización exists vice versa because there is division and; nevertheless and without less end to approach both slopes simultaneously, we understand that it will be the organizational aspect, the one that will try the definitive solution to us.

A systematic propaganda and pertinaz about the shortage and of the operation of the workers, who nobody doubt that there is to carry out it, will help us but it is not going to us to facilitate the organic unit of the working class, if it does not go accompanied with the strategy of vertebración of the labor movement. There is nothing no to invent, the company committee gives the key us for our performance.

The original Document of the FUT explains clearly, that the majority unions with little affiliation, stays and can influence in great masses of workers, thanks to the electoral system in the work centers. It is not necessary to repeat it. And as solution gives a series of prescriptions: “In answer to this situation, we defend that the ASSEMBLIES OF WORKERS name their representatives (committees, commissions or delegates) using the method that they create but opportune, as she could by hand be raised in summoned extraordinary assembly on the matter, or by means of universal suffrage with a single list opened by each electoral school.

Later we defend the constitution of the assembly of committees of companies of he himself union, with which it would be formed the UNIQUE UNION OF UNION.

Later we advocated the Assembly Interunions, composed by the representatives chosen in the different assemblies from unions by territory (local, provincial, regional or national and state) being definitively formed the UNIQUE POWER STATION OF WORKERS.

Naturally, at the moments that we lived not they give the conditions so that in all the centers of work the process by the principle can be initiated, that is to say, by the Assembly of Workers, for that reason, the propaganda to democratizar the assemblies must be constant, so that little by little it is piercing in the mind of the workers. The problem of the assemblies will be resolved in the long term, if no, everything would be but simple of which at first it seems to us.

But the satisfactory note but of which it express the document of the FUT, is that it is possible to be begun by any side and we must choose and the closest possible one, although all are very difficult.

That is to say, if the assembly of committees and delegates of companies existed, we would plead in our propaganda for the constitution of the Assembly Interunions etc. We must be conscious of which we have at the hand and that does not suppose at the present time any utopia, or something distant to the workers. We are talking about to the delegates and committee s de empresas.

It is necessary to propagate and to propose by any means, the assembly of committees of companies and delegates of union in the first place (, since we have seen does not finish the structuring) does not concern the political and union color of its components, it does not matter here either, the conscience degree that hoards the committee. The calls committees and delegates of influence of unions yellow and made by the industralists even must be forced to participate in the assembly that must be institutionalized.

We know that the unions are against one such slogan, since it is the antithesis of his political activity, directed to divide, but it is necessary to perseverar and on a par that is invited to the committees for its participation, it is necessary to heatedly spread between the workers the necessity that they press his “representatives” so that its company is present in the assembly.

Here solidarity begins, begins the discussion of the common problems here, this one must be the organism that can restrain the union and labor repression of the industralists and this one will be the formula to face the privatizations and deslocalizaciones.

The single constitution of the assembly of delegated committees of companies and will cause the indignation of the power stations and specially of the industralists and will provoke an ample debate between the workers, due to the frustrating experiences that day to day accumulate sinsabores in the labor scope.

In addition, to carry out one such slogan, single it is enough desires and to start up and is an objective for any union worker or no, or group of workers eager to change the present state of the labor movement. And mainly, it can be an extraordinary incentive for the conjunction of activities of the political parties, with which we are arranged to collaborate to take to good port the unit of the working class from this point.

It is necessary to end of once and for always the sad spectacle that concretely provides the one that the dismissal of a worker of the CNT, or CC.OO., or the UGT etc. single is secundado by the workers of their company and but only by the union to which

the dismissed one belongs. A SINGLE CLASS, AN ORGANISM THAT REPRESENTS IT: THE ASSEMBLY OF COMMITTEES AND DELEGATES OF COMPANIES.

The Party on the other hand and also the FUT by his will dedicate an extensive campaign of propaganda to open debates on this aspect of the labor movement, simultaneously that will explain what content must have and as they must be his objectives.

We do not have to fear that once obtained to the assembly of delegates and committees, in this one preweighs the unions of reformist tendencies. This assembly of in case it constitutes a great step to continue with our work until reaching the democratization of the assemblies. Anyway, it would mean a backward movement of the employer's association and the unions, a step upwards, towards the construction of the unique union so and as it preaches the FUT.

The party

That it doubts fits that jointly with the putting in practice of our tactics to introduce to us in the movement shifts, it will happen the consolidation and organic extension of the PCOE. As much to consolidate the existing thing as to receive with guarantees of operation the new militants, the party must be centered in the leninistas norms of organization and very specially it must strictly observe the defense of the principles Marxist-leninistas.

It is not easy, with the circumstances that surround to us. We never must forget that the PCOE as soon as has in agreement voice and is it obtaining, will find many ties that will oppose our enemies of class. We see as all the propaganda is in certain way handled by interests.

Those centers of diffusion that are self-proclaimed independent and open to all type of information “even come from where it comes from the left” are showing his true face (Kaosenlared, Rebellion…) denying the participation to us. And still the party is small, but its ideology is strong and its tactics are guessed right.

On the other hand, we do not have to let take to us by false feelings nor by the appearances. The Communist Movement the International still is under the effects of the crisis and many parties, have still not found their ideological identity in spite of their ultrarevolutionary verborrea.

After see as happen the the meeting between Party Communist worldwide, (with those that agree de acuerdo) and after observe that of these meeting and seminary arise declaration very “revolutionary” in defense of the the principle, attend also stupefied, as attack to the marxism-leninismo, without no of these party raise his voice against who or who mount such attack. We talked about in particular the uprisings of the president of Venezuela, Mr. Chávez. The PCOE has always stood out and will continue in this line whichever Venezuela and Chávez their president, declares of anti-imperialist. But in the same way that the support of the parties Marxist-leninistas to the present stage of the bolivariana revolution, has not been enough to him to Mr. Chávez not to attack against them (against the marxism-leninismo), similarly to the Marxists-leninistas nobody must demand to them that they are not able to defend his principles when they are despised and pisoteados by Mr. Chávez or any other.

The European left, perhaps by its inoperancia, or lack of short term perspective has deposited all its hope in Latin America, reaching the conclusion that it will be that way by where will come the socialism again. We are not going to desdecir nothing on the matter, because he is not it in this report, but the analyses that have been carried out are triunfalistas and were of the marxist-leninist margin. Single Cuba deserves creditor to us of the Socialist title, whereas the other countries not even glimpse so far their threshold.

The PCOE supports all the Latin American movements that are raised against in justice and imperialism, but of considering there that all movement leads to the socialism we understand it like an aberration that we are not arranged to maintain. For the PCOE, the source of where emanates the premises and the ideological direction against the capitalist system, to construct the socialism it is necessary at the present time to look for it in the marxism-leninismo, to which we did not resign nor we will resign and whose cause we give sense to our existence.

Vulnerable Colombians must be supported and protected

Ask your representative to co-sponsor H. Res 618

Proceso de Comunidades Negras
Thursday 4 October 2007

Please ask your representative to co-sponsor H. Res. 618, a resolution that acknowledges the grave humanitarian conditions that many Afro-Colombian civilians live in. Express your concern regarding the violations of the human, territorial and cultural rights of Afro-Colombians, and the hope that this resolution will serve as an educational tool to bring attention to this critical situation.

To: Foreign Policy Aides, U.S. House of Representatives
Date: October 4, 2007

We, the undersigned organizations and individuals, ask that you co-sponsor H. Res. 618, a resolution that acknowledges the grave humanitarian conditions that many Afro-Colombian civilians live in. We wish to express our continued concern regarding the violations of the human, territorial and cultural rights of Afro-Colombians, and we hope that this resolution will serve as an educational tool to bring attention to this critical situation.

The humanitarian, human rights and internal displacement crisis that Afro-Colombian communities face has long been a concern of many organizations and individuals in our network. Despite the collective territorial rights granted to Afro-Colombians along the Pacific coast under Law 70 of 1993, Afro-Colombian communities in this region have become internally displaced due to the internal armed conflict, threats of violence and fighting related to territorial disputes between guerrillas, paramilitaries, and the Colombian army. There exists a long list of examples of how the violence and

internal displacement perpetrated by all of the armed groups has taken its toll on Afro-descendant communities. In the municipality of Buenaventura (Valle del Cauca), the situation of Afro-Colombians civilians has significantly deteriorated in the past few years. In 2006, Buenaventura city experienced some 38 terrorist attacks including car bombs and the like. Since January 2007, over 200 persons, mainly Afro-Colombian youths, have been assassinated due to fighting and violence among all of the warring parties. In the department of Chocó combat between the armed groups has internally displaced hundreds of thousands of Afro-Colombians over the past ten years. Those who wish to return find that their territories have been unlawfully appropriated by illegal armed groups and third parties. In the northwestern part of this department, palm oil companies that allegedly operate in collusion with paramilitary groups have appropriated lands belonging to Afro-Colombians.

In April 2007, in response to the recent internal displacement of 7,000 people in the department of Nariño, twenty-five NGOs and individuals sent a letter to the Colombian Vice-President Francisco Santos appealing the government to respond to the humanitarian crisis, protect the rights of Afro-Colombians internally displaced by the violence, and ensure the displaced have access to humanitarian assistance, such as food, medicine, shelter and protection.

It is our belief, as members of diverse U.S. organizations as well as concerned individuals, that vulnerable Colombians must be supported and protected, and that their rights to a dignified life must be respected. For this reason, we strongly recommend that you co-sponsor H. Res. 618, which will help bring attention to this dire situation and set the stage for more balanced and informed policy towards Colombia.

Thank you very much for your attention to these important matters. We hope that we can count on your continued support for the promotion of human rights and socio-economic justice in Colombia.

Colombian San Jose Peace Community members detained in Tel Aviv airport

Colombia Support Network
Friday 12 October 2007

The Colombia Support Network (CSN), has received word form the Peace Community of San Jose de Apartado that two members of the Peace Community, Arley tuberquia and Martha Vásquez, were detained by the Israeli secret service in the Tel Aviv airport. They had arrived to participate in the Grace Peace Pilgrimage from Eilat, over Bethlehem to Jerusalem. These members of the Peace Community, itself a nominee
for the Nobel Peace Prize, apparently are being treated by the Israelis as terror suspects. They are, of course, in no sense terrorists. They have been the sister community of Dane County,Wisconsin for many years. The San Jose Peace Community is totally committed to peace and rejects arms.

Please write Israeli Prime Minister Ehud Olmert to tell him that Peace Community members are not terrorists and that Arley and Martha should be released immediately and send a letter to US Secretary of State
Condoleezza Rice urging her to press the Israeli authorities for the immediate release of these Colombian pilgrims for peace.

Please send copies of your letters to your Representatives in Congress and urge them to write to the Israeli authorities.
